Kamco Division | GREAT LAKES COPPER

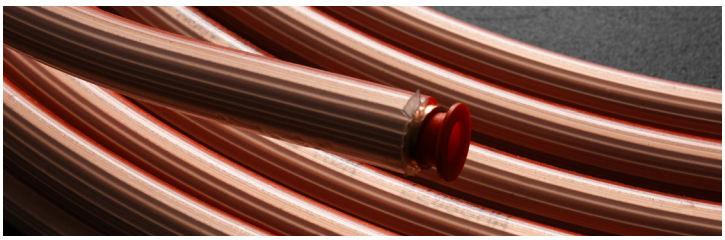

OIL V-TEC™ FACTORY COATED COPPER TUBE

THE ULTIMATE VISUAL INSPECTION OF FUEL OIL TRANSFER LINES

As an industry leader in coated copper tube, and known for superior quality and innovative products, Kamco® continues to bring you improved products to service your installation needs. Our new "V™" Series provides the ability for visual inspection and leak detection, one more advantage when you choose Kamco®. Should a leak occur in the piping system, the clear section provides a window for visual inspection and identification of the problem area. This innovative feature, combined with our standard inner grooved tubing, provides the ultimate in Fuel Oil tubing.

Oil V-Tec™ tubing is easy to install and can be added to existing steel pipe. No special training is required because the tubing is flexible and easily joins with standard fittings. The continuous line-marking indicates tube contents, size, ASTM specification and ensures the tubing can be traced back to the origin of manufacture.

	NOMINAL SIZE	WALL THICKNESS	STANDARD LENGTHS
OIL V-TEC™	3/8"	.032"	50' 100' 250'
	1/2"	.035"	60' 100' 250'
	5/8"
