DFARS COMPLIANCE STATEMENT

Great Lakes Copper Ltd – Copper Tube Products

Great Lakes Copper Ltd. manufactures seamless copper tube products from UNS C12200 (Phosphorus-Deoxidized, High Residual Phosphorus Copper).

Material Composition

The nominal chemical composition of UNS C12200 copper is:

- Copper: 99.9% minimum
- Phosphorus: 0.015% – 0.040%

DFARS Applicability

Great Lakes Copper Ltd. Recognizes that certain provisions of the Defence Federal Acquisition Regulation Supplement (DFARS), including DFARS 252.225-7008 and DFARS 252.225-7009, establish requirements related to specialty metals and specified covered articles.

Copper and copper alloys, including UNS C12200, are not included within the definition of specialty metals under these provisions. Accordingly, seamless copper tube products manufactured by Great Lakes Copper Ltd. from UNS C12200 copper are not considered specialty metals as defined by the applicable DFARS specialty metal requirements.

Quality Assurance and Traceability

Great Lakes Copper Ltd. maintains material identification and traceability systems applicable to its copper tube products and retains records demonstrating conformance with applicable material specifications and product requirements.
