Kamco Division

GREAT LAKES COPPER

AQUA SHIELD® FACTORY COATED COPPER FOR POTABLE WATER LINES

Known for our superior quality and unprecedented customer service, Kamco® Products is the leading manufacturer of polyethylene-coated copper tubing in North America. Kamco® uses only the highest quality tubing available to ensure our customers can walk away from an installation with pride.

- **Added Corrosion Protection**
- **Easy to Install**
- **Eliminate on-site sleeving in many areas**
- **Easy to measure: descending footage is line-marked on the coating**

WHY USE POLYETHYLENE COATED COPPER?

Aqua Shield® eliminates the need for on-site sleeving and tape wrapping in many areas due to its added corrosion protection. The tubing can be direct buried underground and is compatible with standard compression fittings or soldering/ brazing techniques used for potable water line installations. The polyethylene coating contains UV inhibitors to help avoid breakdown if in contact with direct sunlight, giving you the option to store the tubing outdoors.

The coating also features continuous line-markings indicating tube contents, size, ASTM specification and descending footage markings. In addition, Kamco® prints a lot number directly on the tube enabling it to be traced back to the origin of manufacture. Aqua Shield®'s polyethylene coating is extruded to meet a minimum of .026 mil thickness.

INSTALLATION TIP

By removing the burr on the copper prior to joining, you will improve your water flow by eliminating water turbulence that is known to contribute to erosion corrosion. A simple deburring tool like the one shown is just an easy way to help make your installation of coated copper a success.

For more installation tips, call us today at 1 800 265 9271.

	NOMINAL SIZE	OUTSIDE DIAMETER	WALL THICKNESS	STANDARD LENGTHS U.S	STANDARD LENGTHS CANADA	COLOUR
TYPE L	1/2"	5/8"	.040"	60' & 100' Coils	60' & 100' Coils	BLUE & RED

	1"	1 1/8"	.065"	60' Coils	66' Coils	BLUE
	1 1/2"	1 5/8"	.072"	20' Straight Lgths	20' Straight Lgths	BLUE
	2"	2 1/8"	.083"	20' Straight Lgths	20' Straight Lgths	BLUE

existing service lines. Custom line-marking is available upon request to include a utility's name for further identification.

FOR PLUMBING APPLICATIONS

Aqua Shield® factory coated copper is available in both blue for cold water and red for hot. This color coding and continuous line-marking easily identifies tube contents. The tubing can be direct-buried underground and also run through concrete slabs. Aqua Shield® is easy to install with no additional training required.

FOR MUNICIPAL APPLICATIONS

Aqua Shield® tubing is available in many sizes, including straight lengths. It can be used alone or in conjunction with cathodic protection to increase the life of the tubing. The polyethylene coating used is a very abrasive resistant plastic which is ideal for "pull throughs" when replacing

THE KAMCO® COATED COPPER DIFFERENCE

At Kamco®, we are dedicated to providing our customers with superior quality products that help make their installations easier and more efficient. And we back that quality up with a strong commitment to outstanding customer service. We listen to our customers. In fact, the innovative products we are recognized for have all been inspired by our customer's suggestions and requests. Our goal is to cover all your installation needs.

We want to hear about them. And we want to meet those needs. We have a responsive customer service team anxious to hear how we can make your next installation easier and hassle-free.

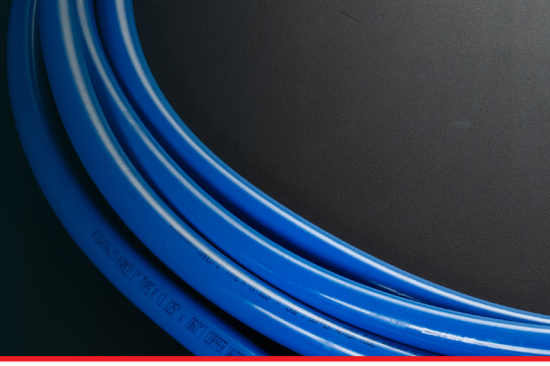

We encourage you to call us toll-free at 1 800 265 9271 with your feedback.

Kamco | GREAT LAKES COPPER

AQUA SHIELD® FACTORY COATED COPPER FOR POTABLE WATER LINES

CUSTOMER DRIVEN QUALITY

- Use only the highest quality copper tubing available.
- All tubing quality inspected.
- Manufacturing facility dedicated to coated copper production.
- Quality control: unique lot numbers printed directly on copper and outer coating for traceability.

CUSTOMER DRIVEN SERVICE

- Fast delivery: within 2-4 days to most wholesalers across the US & Canada.
- Dedicated contractor & wholesaler support.
- Innovative products driven by customer suggestions.

ALL GOOD THINGS MUST COME TO AN END

Try the Kamco Copper Stopper™ on your next gas installation. This custom termination flange transitions the copper tube back to standard pipe, reducing the amount of tubing required for a job and protecting the line from damage. It also leaves a clean and professional finish. Call us today for details.

CUSTOMER DRIVEN INNOVATION

At Kamco®, we are proud to say that every product we manufacture was inspired by customer feedback. It is our goal to simplify installations for our customers, while providing exceptional quality tubing. In addition to Aqua Shield®, Kamco® also manufactures polyethylene-coated copper tubing for gas, fuel-oil and various industrial applications.

For gas applications, we offer coated copper tubing providing added corrosion protection and clearer identification of tube contents. We have also developed Gas-Tec Plus™, an outer -sleeved coated copper tubing for applications requiring additional physical protection. For fuel oil applications, we manufacture both coated copper tubing and outer-sleeved coated copper tubing. Both are extruded with a uniquely grooved polyethylene coating that protects the copper from corrosion and assists with leak detection in the event of a line failure or pin hole. We are a customer driven company that is continuously looking for ways to make your next installation easier.
