Kamco Division | GREAT LAKES COPPER

Kamco | GREAT LAKES COPPER

EXTRA PROTECTION PLUS EASY REMOVAL

For special application fuel oil installations, there is no simpler product available. Kamco® is proud to introduce V-Tec PLUS™, yet another innovative product designed from customer-driven research and development. V-Tec PLUS™ combines Kamco's Oil V-Tec™ tubing with a black polyethylene sleeve.

This now eliminates the hassle and expense of on-site sleeving in areas where factory-coated copper tubing needs additional protection. And when the tubing is buried under concrete, not only is the inner tube protected from any damage, but if necessary, V-Tec PLUS™ allows for quick and easy removal of the tubing without having to jackhammer the concrete.

Call us toll-free at 1.800.891.0800 for more information.

THE STRENGTH OF OIL V-TEC™

- Protects environment from oil contaminants
- Protects copper from corrosion
- Inner grooved to assist in containment and leak detection
- Continuously line marked for clearer identification
- Easy to install - no additional training required
- Economical

PLUS

THE PROTECTION OF FACTORY SLEEVING

- Eliminates on-site sleeving for special applications
- Protects tubing from exterior physical damage (flowers beds, door thresholds and high traffic areas)
- Adds containment
- Quick and easy removal of tubing from concrete if necessary
- Time & cost savings
